Boost Your Research

by using

INTERNET ARCHIVE
and
Google books
and

Artificial Intelligence

Two most popular (free) AI tools

ChatGPT
- App available on iPhone or Android smartphones
- Website: ChatGPT.openai.com

Copilot
- App available on iPhone or Android smartphones
- Website: Copilot.microsoft.com

Copilot is recommended as the superior AI tool for family history research and other applications.

Just ask Copilot a question or tell it to do something (e.g. draw a picture, compose something, etc.)

Ask follow-up questions as in an interactive conversation.

A digital library with the stated mission of "universal access to all knowledge". It provides free public access to collections of digitized materials, including websites, software applications/games, music, movies/videos, moving images, and millions of books. The Internet Archive holds:
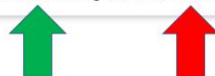

ARCHIVE INTERNET

40 million books and texts	11.6 million movies, videos and TV shows	950 thousand software programs
15 million audio files,	4.5 million images	251 thousand concerts
	780 billion web pages	

Begin the search . . .

Google

🔍 [what your are looking for] internet archive 🎤

What you are looking for may be a specific title or a generic description of what you are looking for.

Some books may be accessed freely; others with copyright may require your sign-on information. Borrow one hour at a time.

An account is free, safe, and without pesky solicitations for premium service.

Google Books

Every word in 40+million books is indexed. Search for a character string—such as an ancestor's name.

Remember!!

1. Use Google Books to *find* title and page no. of a book with information
2. Use Internet Archive to *read* the information in the book
